

# RISHABH KHARBANDA

## SENIOR MARKETING ANALYST

Faridabad, India | +91 8604726050 | rishabhkharbanda08@gmail.com | [LinkedIn](#) | [Portfolio](#)

### SUMMARY

---

Senior Marketing Analyst with 5+ years of experience driving growth across gaming, fantasy sports, e-commerce, and B2C markets. Specialises in performance marketing, lifecycle analytics, and paid media optimisation — with a track record of reducing CAC by 17%, cutting ad spend by 55% while sustaining results, and delivering 70% MoM e-commerce growth. Deep expertise in cohort analysis, attribution modeling, retention marketing, and user segmentation. Experienced across international markets (Malaysia, Australia, Papua New Guinea) and proficient in Tableau, Power BI, Python, SQL, AppsFlyer, Clevertap, and WebEngage.

### PROFESSIONAL EXPERIENCE

---

#### Senior Marketing Analyst, Yong Yuan Casino

Malaysia, Australia & Papua New Guinea (Remote)

Oct 2025 – May 2026

- Built 8+ Tableau dashboards tracking player acquisition, retention, engagement, and revenue KPIs across multiple markets, reducing reporting time by 40%.
- Analyzed player journeys and behavioral data to identify conversion opportunities, improving player registration and engagement rates by 18%.
- Conducted funnel analysis across 10+ landing pages and onboarding flows, increasing player sign-ups by 25% through user experience improvements.
- Performed cohort analysis and player segmentation to identify churn patterns, supporting targeted retention campaigns and personalized re-engagement strategies.

#### Senior Marketing Analyst, Head Digital Works (A23) (Gaming & Fantasy Sports)

Hyderabad, India

Sep 2024 – Sep 2025

- Analyzed player behavior and segmented users by geography and value tiers (HVP/MVP), improving retention efficiency and reducing CAC by 17%.
- Optimized player acquisition and retention investments, reducing monthly marketing spend by 55% while maintaining player growth and engagement targets.
- Built D0–D30 player cohort analyses and personalized onboarding journeys using WebEngage and AppsFlyer, reducing new-player churn by 15%.
- Conducted player and competitor analysis to identify engagement opportunities, contributing to product enhancements and retention-focused initiatives.
- Executed poker acquisition events across IITs, IIMs, and Goa poker venues, driving player acquisition, community engagement, and brand loyalty.

#### Marketing Analyst, KSKT Agromart

Gurugram, India

Dec 2023 – Aug 2024

- Scaled online sales by 70% MoM through data-driven campaign optimization and retention marketing.
- Built KPI dashboards for sales, marketing, and operations reporting.

## PROJECTS

### Marketing Attribution & Performance Optimization Platform

Tools: SQL, Python, Tableau, AppsFlyer

Developed an end-to-end marketing attribution and performance analytics platform to measure channel effectiveness across the customer acquisition funnel. Integrated campaign data from multiple paid media sources and built automated dashboards tracking CAC, CPL, ROAS, conversion rates, and revenue contribution by channel. Performed audience, creative, and campaign-level analysis to identify optimisation opportunities and improve budget allocation decisions, implementing attribution models to evaluate customer touch-points and support data-driven marketing strategies.

- Built automated dashboards for campaign performance monitoring.
- Developed channel-level attribution and ROI measurement frameworks.
- Identified acquisition optimisation opportunities through audience segmentation.
- Delivered actionable insights for budget allocation and marketing efficiency improvements.

### Customer Lifecycle & Retention Analytics Framework

Tools: Python, SQL, Tableau, WebEngage

Designed a customer lifecycle analytics framework to track user behaviour across acquisition, activation, engagement, retention, and re-engagement stages. Built cohort models covering D0, D7, D30, and D90 retention periods to analyse customer behaviour and identify churn patterns. Implemented customer segmentation models based on engagement frequency, transaction behaviour, and customer value, creating retention dashboards and performance reports that supported personalised lifecycle marketing campaigns and customer journey optimisation initiatives.

- Developed retention and churn analysis models using cohort methodologies.
- Built customer segmentation frameworks for targeted marketing campaigns.
- Created executive dashboards for lifecycle performance tracking.
- Generated actionable insights to improve customer engagement and retention.

### **Marketing Intelligence & Executive Reporting Platform**

Tools: Tableau, Power BI, SQL, Python

Built a centralised marketing intelligence platform that consolidated marketing, customer, and revenue data into a unified reporting environment. Designed executive dashboards tracking acquisition performance, campaign effectiveness, customer retention, revenue growth, and key business KPIs. Automated data processing workflows and reporting pipelines to reduce manual effort and improve reporting accuracy, delivering real-time visibility into business performance for faster leadership decision-making.

- Automated marketing and business KPI reporting processes.
- Built executive dashboards for acquisition, retention, and revenue monitoring.
- Integrated multiple data sources into a centralised reporting framework.
- Reduced manual reporting effort through automated data workflows and dashboard refreshes.

### **Sales Performance Dashboard**

Tools: Tableau, Python

Developed a sales performance dashboard for a retail company. Used Python for data cleaning and preprocessing, then built interactive Tableau visualisations covering total sales, growth trends, top-performing products, and regional breakdowns.

### **Customer Segmentation Analysis**

Tools: Python, Excel, Tableau

Built a customer segmentation model for an e-commerce platform using Python and clustering algorithms to segment users by purchasing behaviour and demographic data. Visualised segments in Tableau for targeted lifecycle marketing.

## **ADDITIONAL INFORMATION**

---

- Languages: English (Fluent), Hindi (Fluent)
- Certifications: Google Digital Marketing Certification, Udemy Python Developer Certification
- AI Tools: ChatGPT (GPT-4), Claude, Gemini, Perplexity AI — used daily for campaign copy, data summarisation, insight generation, and automation prompts
